# 1. Introduction

---

Last years of digital and crypto transformation, legalization, and crypto adoption have showed us that it is almost impossible to combine successfully multiple functions into one coin or token. Especially when we speak about Meme tokens that have zero initial value. None of the Meme tokens has successfully survived till the present day keeping both value and trust for a long period. However, none of them has ever combined meme, utility and financial functions before: Meme+Utility+Finance = let`s call them **mufin tokens**. We expect that the impact of such MUFin tokens in crypto industry would be impossible to overestimate in the next 2 years. We deeply believe that functionality combination is the next evolution trend in crypto world.

Our team is happy to announce the birth of the first ever “**mufin**” ecosystem – **Tyranno network**. Tyranno network is a decentralized ecosystem based on TON blockchain and Network – The Open Network. The core of the Tyranno network is its inner **TYRO (Tyranno) token**. Our team is focused on building various utility and financial functions for the TYRO token and ecosystem itself, that includes the Tyranno Tap and Play to Earn Game. Tyranno network`s primary aim is to create free, decentralized, safe, cheap, easy-to-use, and worldwide accepted multifunction instrument that will help anyone making life easier and bringing huge profits to TYRO token holders and users. We believe that we will create incredibly huge community of Tyranno ecosystem in short terms, showing the real extreme possibilities of TON blockchain to its users.

# 2. TYRO Network

## 2.a. Token basis and utility

- 1 TYRO (Tyranno) token is not just a Memecoin, that is first MemeCoinKiller! TYRO combines meme, unique utilitarian, and financial properties. Forget about the useless Memecoins that have a limited lifespan and that are often fraud... at least before the TYRO token birth.
- 2 Tyranno ecosystem blockchain and network is TON (The Open Network). That is one of the best scalable, fast, reliable, and cheap blockchain. In fact, that is one of the fastest transaction systems for today.
- 3 Tyranno ecosystem is the universal cross bridge between blockchains. Now the gas value or transaction costs in various networks can be carried out in TYRO tokens.
- 4 Tyranno network`s OpenAI engine allows managing Smart Contracts and creating users` tokens in any supported blockchain.

Now the creation of users` own tokens on any network is an elementary process. Using algorithms and the unique OpenAI engine, anyone can create own tokens on any supported network, develop and deploy Smart Contracts, paying the minimal commission via TYRO tokens.

- 5 Tyranno network has a simple, native, anonymous, protected, universal DEX wallet and DEX crypto exchange platform with access to the staking of cryptocurrencies, as well as to hybrid investment instruments provided by international reception partners.
- 6 Low commissions. Our team believes that the commission policy for any transactional operations should be so small that users should not even think about the commission itself while working with our network.

● *Continued on the next page...*

## 2.a. Token basis and utility

---

- 7 TYRO token is the universal payment tool for goods and services worldwide. Our team is already negotiating with the first international companies who would accept payment for goods and services in TYRO token.
- 8 Tyranno network will support the deposit and withdrawal of fiat money, the purchase and sale of tokens via fiat money. At the initial stage, international payment vendors will be integrated for depositing and withdrawing fiat currencies. That will be done to start receiving payments in fiat already at the initial stages. In the following months, we plan to unfold our payment processing product to optimize the transaction cost.
- 9 Staking in TYRO and deposit products into different crypto assets. TYRO can be used for staking at an average rate from 5% up to 20% per annum depending on the time deposit program. Additionally, our network supports partnerships with investment and deposit funds, allowing to deposit fiat, tokens and coins into different products via Tyranno wallet.
- 10 Own DEX Crypto exchange with listing of any cryptocurrency and support of anonymity function. Now, the crypto exchange match engine has already been fully developed by our team. First supported basic blockchains for end of 2026 are: BTC, ETH, TRX, NEAR, SOLANA, BEP20, AVALANCHE.
- 11 “DINO WARS” play-to-earn game and tap app allows users to earn the TYRO token based on TON (Ton Open Network) by playing the Tyranno game. The core currency of the game is TYRO point that could be changed to TYRO token, TON or any other crypto. It also can be won for free by playing a single play or multiplayer game, or that can be bought via fiat money or any supported cryptocurrency. The game is supposed to be a long-life.

## 2.b. Tokenomics and specification

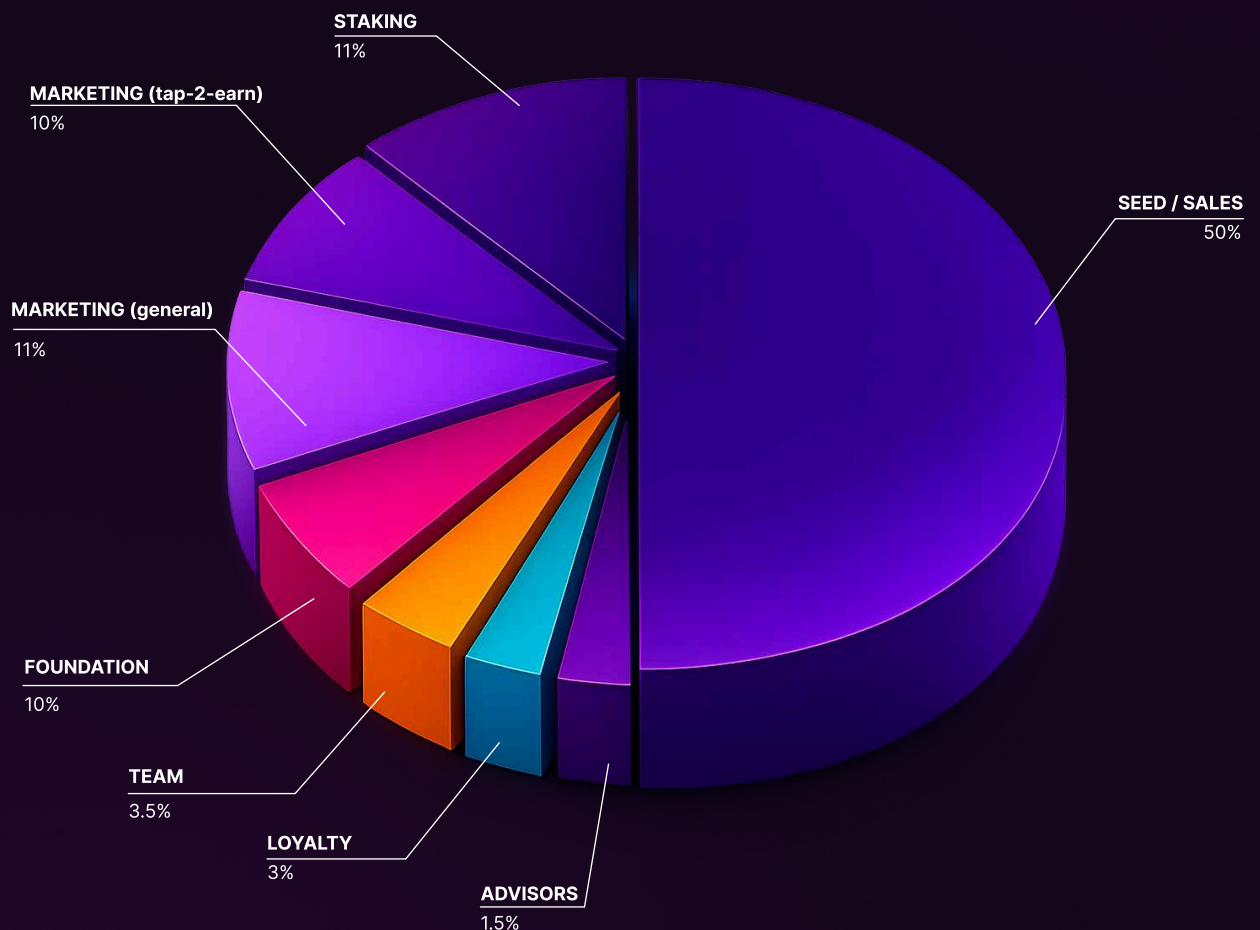

---

- Ticker Symbol: TYRO.
- Supply: 10,000,000,000.
- Network: TON (The Open Network).
- Economic model: deflation.
- TYRO token Angel investor sales start date: 18.05.2026
- TYRO token pre ICO and ICO sales start date: 18.06.2026
- Buy / Sell Tax: 3% from 18.05.2026 to 31.12.2026.
- Tax TYRO tokens: 1) 1% will be burned; 2) 1% will go to marketing; 3) 1% will go in TON token to stakeholders over 10 000 000 TYRO.
- Marketing tap-2-earn and play-to-earn program start: 18th of May 2026.
- All unsold tokens are supposed to be burned.
- The TYRO token buyback quantity will be announced every 4 months starting from 01.01.2027.
- 50% TYRO buyback tokens will be burned to support the deflation model of TYRO network, the remaining 50% will go to staking fund.
- Staking options for the first year: 5% - 3-month period, 10% - 6-month period, 15% - 9-month period, 20% - 12-month period. Early withdrawal is allowed without any stake income.
- Stakeholders over 10 000 000 TYRO will receive network governance right for project development.
- TYRO token limit transaction till 31.12.2026: 5 000 000 TYRO.
- First public listing planned date: 10.11.2026.

## 2.c. Token distribution

● Total amount of tokens for sale: 5 000 000 000 TYRO

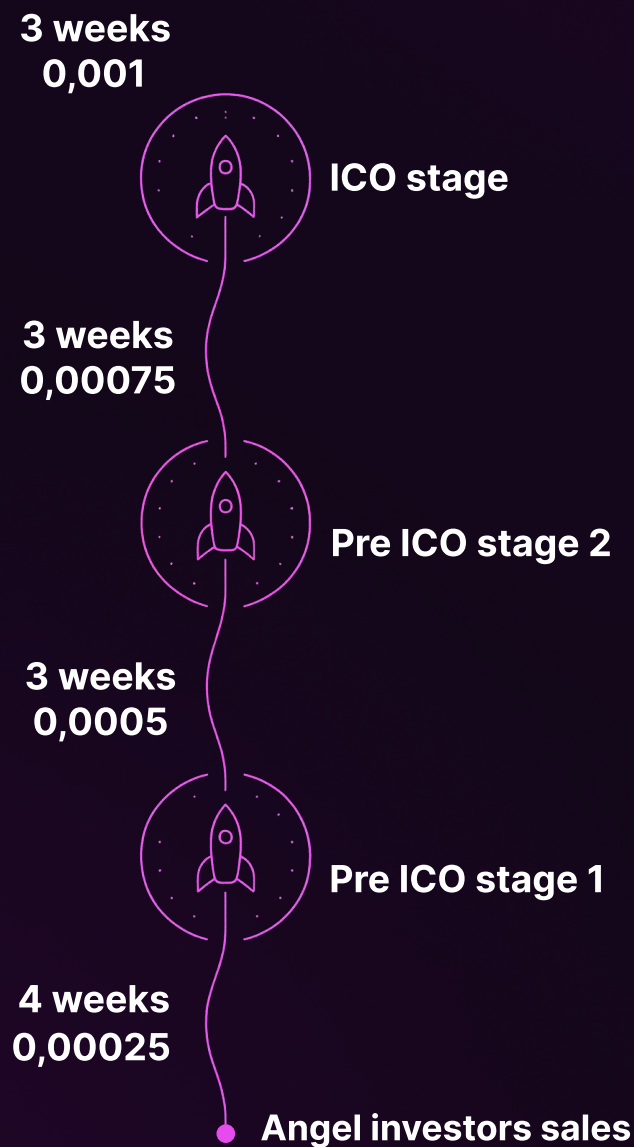

SPLIT	SHARE	AMOUNT	FDV	Cliff (months)	Vesting (months)
MARKETING (general)	11%	1 100 000 000	-	-	-
MARKETING (tap-2-earn)	10%	1 000 000 000	-	-	-
FOUNDATION	10%	1 000 000 000	-	6	6
SEED / SALES	50%	5 000 000 000	\$2,625 mln max	According to sales plan	According to sales plan
LOYALTY	3%	300 000 000	-	6	16
ADVISORS	1.5%	150 000 000	-	6	12
STAKING	11%	1 100 000 000	-	-	-
TEAM	3.5%	350 000 000	-	6	12

## 2.d. Token sales

- Total amount of TYR tokens for sale: 5 000 000 000

Sales	Tokens	%, Total supply	Price, \$	Sale start	Sale end
Angel investors sales	1 500 000 000	15%	0,00025	18.05.2026	17.06.2026
Pre ICO stage 1	2 000 000 000	20%	0,0005	18.06.2026	08.07.2026
Pre ICO stage 2	1 000 000 000	10%	0,00075	09.07.2026	29.07.2026
ICO stage	500 000 000	5%	0,001	30.07.2026	19.08.2026

# 3. Technology

---

## 3.a. Token tech and its evolution

---

Tyranno ecosystem`s blockchain is Ton Open Network. That is the best scalable, fast, reliable, and cheap blockchain. In fact, that is one of the fastest transaction systems for today. Tyranno ecosystem is the universal bridge between blockchains. Now the gas value or transaction costs in various networks can be carried out in TYRO tokens. The core of the Tyranno network is its inner **TYRO (Tyranno) token**. Our team is focused on building various utility and financial functions for the TYRO token and ecosystem itself. Tyranno network`s primary aim is to create free, decentralized, safe, cheap, easy-to-use, and worldwide accepted multifunction instrument that will help anyone making life easier and bringing huge profits to TYRO token holders and users. We believe that we will create an incredibly huge community of Tyranno ecosystem in short terms, showing the real extreme possibilities of TON blockchain to its users.

## 3.b. DEX and Wallet

---

Tyranno network has a simple, native, anonymous, protected, universal DEX wallet with access to the staking of cryptocurrencies, as well as to hybrid investment instruments provided by international reception partners. The wallet is integrated into its own DEX Crypto exchange, that has already been developed by our team and will be deployed within short period of time after the launch. From the very beginning we are ready to start the crypto exchange supporting the following initial blockchains: BTC, ETH, TRX, NEAR, SOLANA, BEP20, AVALANCHE. We are planning to extend the number of supported blockchains to 26 within the first 6 month of exchange operating. TYRO (Tyranno) token is the inner crypto exchange system token.

### 3.c. OpenAI

---

Tyranno network OpenAI engine allows easy one-click management of Smart Contracts and creating users' tokens in any supported blockchain. Any user of Tyranno DEX Crypto exchange has the possibility to create any token he likes while having zero knowledge in the development process. While being integrated into Tyranno DEX Crypto exchange, the Tyranno network OpenAI will issue, deploy and list the users' tokens in several easy and fast steps. The ICO/IEO has never been so easy before. Tyranno project team will focus on developing and integrating OpenAI more widely and will include it to the majority of the ecosystem functionality.

### 3.d. Payment instrument

---

TYRO token is the universal payment tool for goods and services worldwide. Our team is already negotiating with the first international companies who would accept payment for goods and services in TYRO token. Moreover, our network will act as a 3RD PARTY Provider/Agent for international money transfers for B2B and B2C sectors.

### 3.e. Multibridge system

---

Tyranno ecosystem is the Multichain - universal bridge between blockchains that supports multiple chains, promoting efficient cross-chain interactions in the blockchain ecosystem. The gas value or transaction costs in various networks can be carried out in TYRO tokens.

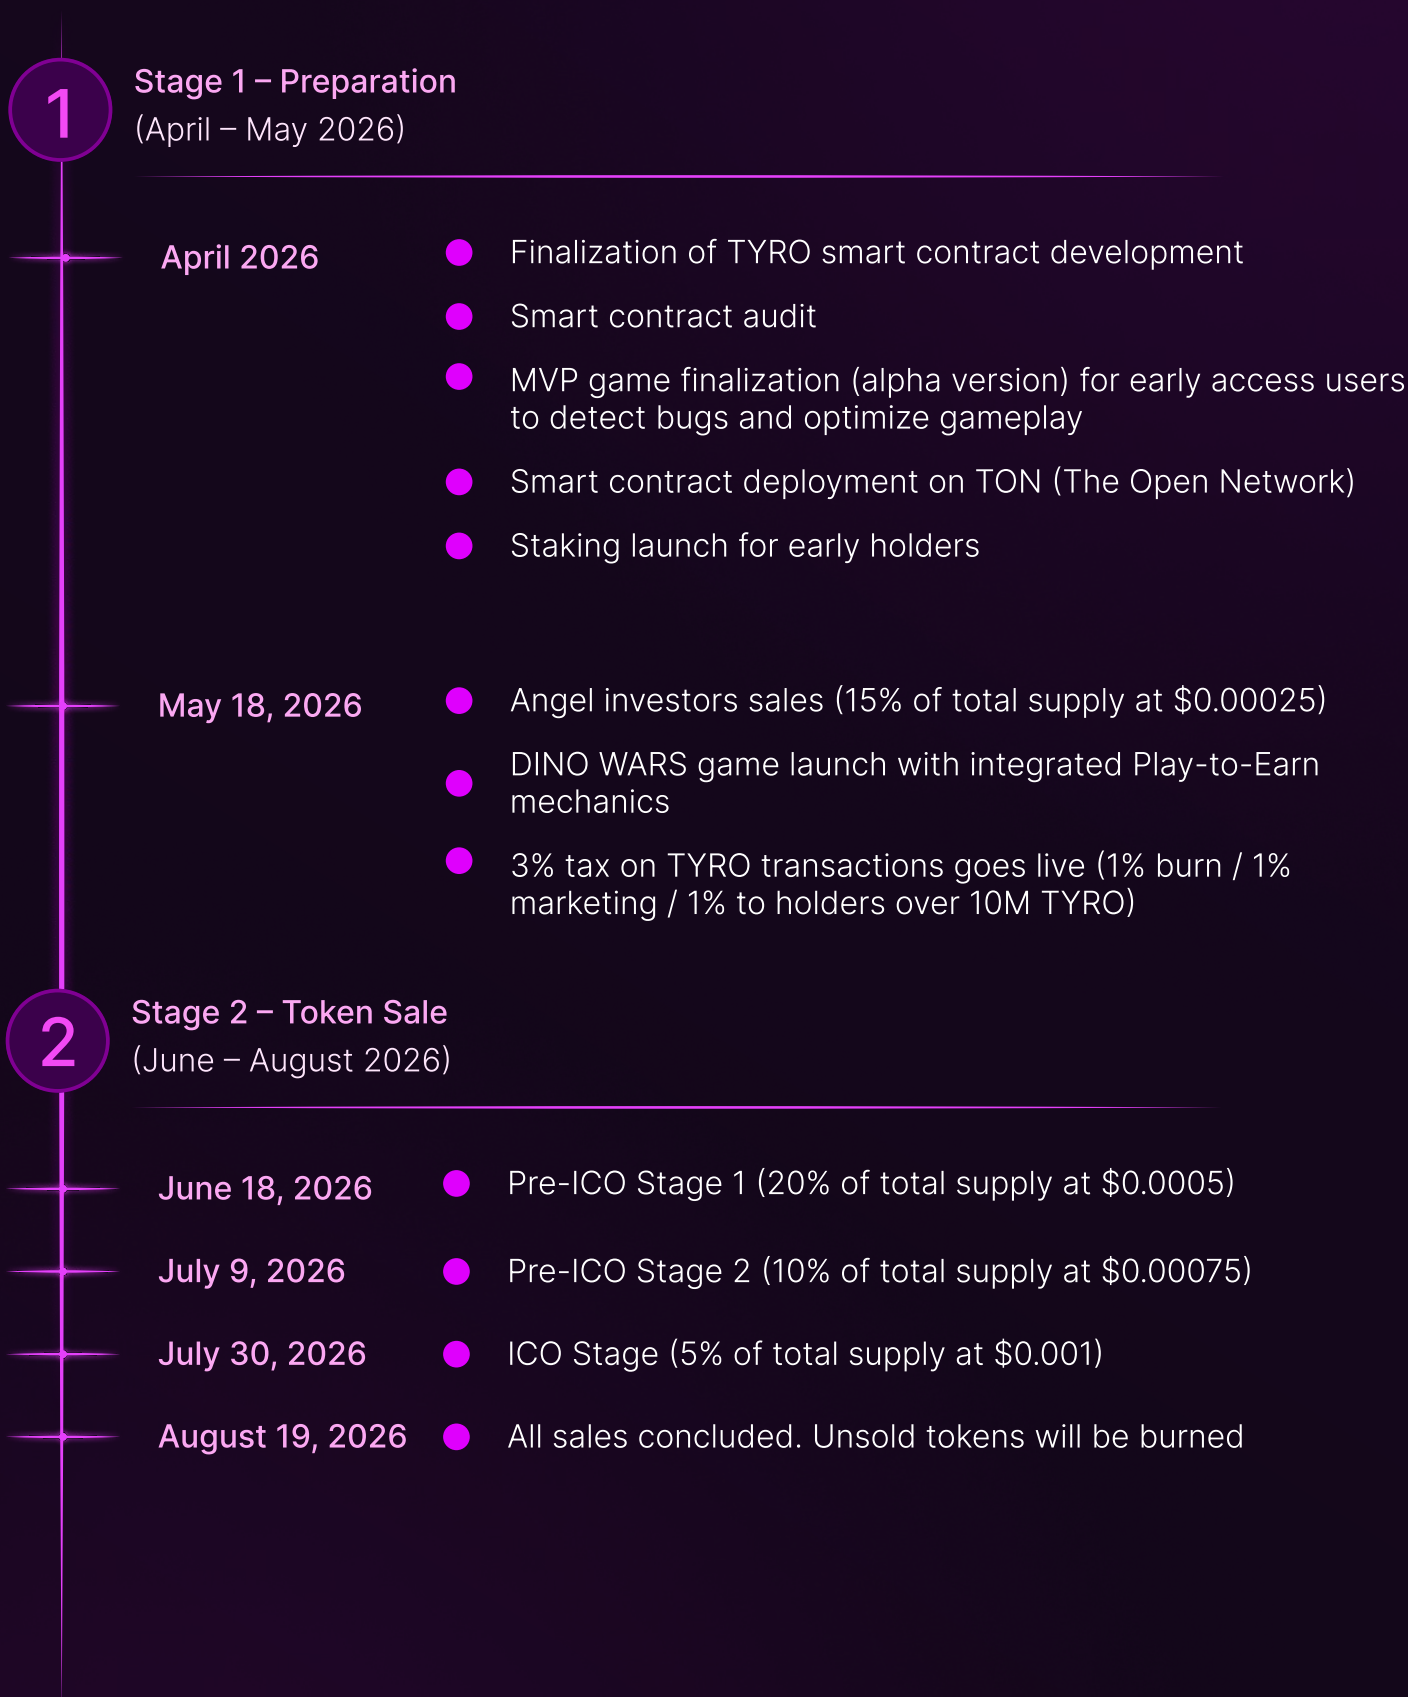

### 3.f. Play and tap to earn

“DINO WARS” play-to-earn game and tap app allows users to earn the TYRO token based on TON (Ton Open Network) by playing the Tyranno game. The core token of the game is TYRO token, that can be won for free by playing the single play game, or that can be bought via fiat money or any supported cryptocurrency.

The game supports single play and multi play options, but the core of the game is the multi play arena games with the betting mechanism, where the players fight against other players, make bets in TYRO and TON tokens while entering the arena, try to take top places with the highest prizes in TYRO token and other crypto currencies. Player and character development, stuff shop, player stuff exchange in-game platform, team battles and many other features are inside that long-life game.

# 4. Roadmap

# 4. Roadmap

3

## Stage 3 – Liquidity & Game Expansion

(September – December 2026)

- September 2026
  - Liquidity pools establishment
  - Public game release (beta version)
  - PvP arena launch with TYRO-based betting mechanism
  - In-game purchases with TYRO implemented
- November 10, 2026
  - First public DEX listing (no later than this date)
- December 2026
  - Marketing campaign and community growth
- December 31, 2026
  - 3% tax period ends
- December 31, 2026
  - Transaction limit (5,000,000 TYRO) expires

4

## Stage 4 – Ecosystem Scaling (2027)

- Q1 2027
  - January 1, 2027 – The TYRO token buyback quantity (every 4 months) 50% TYRO buyback tokens will be burned, 50% will go to staking fund
  - Launch of own DEX exchange. Initial support for basic blockchains: BTC, ETH, TRX, NEAR, SOLANA, BEP-20, AVALANCHE
  - Release of native anonymous wallet with seamless with the game and DEX integration
  - Fiat gateway integration
- Q2 2027
  - OpenAI integration into Tyranno ecosystem – one-click smart contract generation and deployment, user token creation powered by AI
- Q3 2027
  - Cross-bridge solutions between blockchains
- Q4 2027
  - Migration to Tyranno native blockchain

# 5. Team

---

- 1** CEO: Dennis Reddock, 37, co-founder, crypto guru and crypto enthusiast. 10+ years' experience as marketing director in web-tech industry, true team leader who will lead the Tyranno project to the stars.
- 2** CTO: Antonis Potykalou, 42, 15+ years' experience as CTO in digital finance industry and fintech.
- 3** Graphic designer: Gloria Villanueva, 32, 6 years' experience in utilizing after effects, designs, concepts and layouts.
- 4** Systems architect: Maxim Gubarev, 36, 10+ years' experience. Core areas: security, cryptography, blockchain development.
- 5** Senior backend developer: Anton Bobkov, 35, 6+ years' experience, Rust and Solidity blockchain developer, Hyperledger developer with 5 years' experience.
- 6** Backend developer: Kim Chuan, 38, 7+ years' experience.
- 7** Advisor: Helen Fisher, 47, co-founder, angel investor, crypto guru and crypto enthusiast, over 15 successful crypto projects.
- 8** Advisor: Michael Perkhoff, 42, co-founder, angel investor, crypto guru and crypto enthusiast, raised over 200 + mln \$ in crypto investment projects.

## 6. Conclusion

---

Tyranno network is the true worldwide ecosystem powered by both utility and financial aspect. Based on Ton Open Network, it offers worldwide acceptance, fast and cheap transactions, scalability and native use. Tyranno products offer cross chain usage, staking and depositing, easy creation of tokens in any supported blockchains via single instrument, DEX anonymous crypto exchange, investments options, custodial multiwallet and many more options. By using Tyranno network users do not need to have dozens of wallets and exchanges, do not need to worry about security of their funds.

Being as part of our community any user will influence the development of the ecosystem depending on the quantity of TYRO kept in their wallets. The crypto world has never been so simple, productive, and transparent. No matter of how many TYRO tokens are kept in the wallet, everyone is a part of our network, influencing its development and taking huge profits.

## 7. Partners

---

Tyranno network is opened and constantly looking for new partnerships and cooperation. Our vision of the project states that only cooperation processes can lead to the success.

Our planned initial partners, powering tools and integrations from all over the world: MasterCard, Moonpay, Simplex, Advcash, GitHub, Shopify, Stripe, Tether, Sumsb, Coinchange, Blockchain.com, Tellor, Chainlink and many others.
